Our Story

Developing for Over 25 Years

We founded Gaya Interiors not to be just another design office; **we are your private engineering consultant**. Exactly like you choose a sharp lawyer or a doctor you trust, we are by your side at every step to guarantee the timeline, quality of delivery, and execution.

Our experience began in the year 2000 with the Touch of Art engineering group, and we continued that success with Lavera Development, our real estate development arm. This means we are built on a solid foundation of trust and long-term, on-the-ground experience, proven through major projects in Egypt's most important cities – from New Cairo, El Shorouk, and Damietta, to Obour, October, and all the way to New Alamein.

Our Services

Gaya Signature Homes

For villas, residential apartments, and chalets.

Gaya Estate Projects

For large-scale commercial malls (like our projects in El Shorouk and New Alamein).

Gaya Commercial Projects

For administrative offices, companies, retail stores, and medical clinics.

Gaya Bespoke Furniture

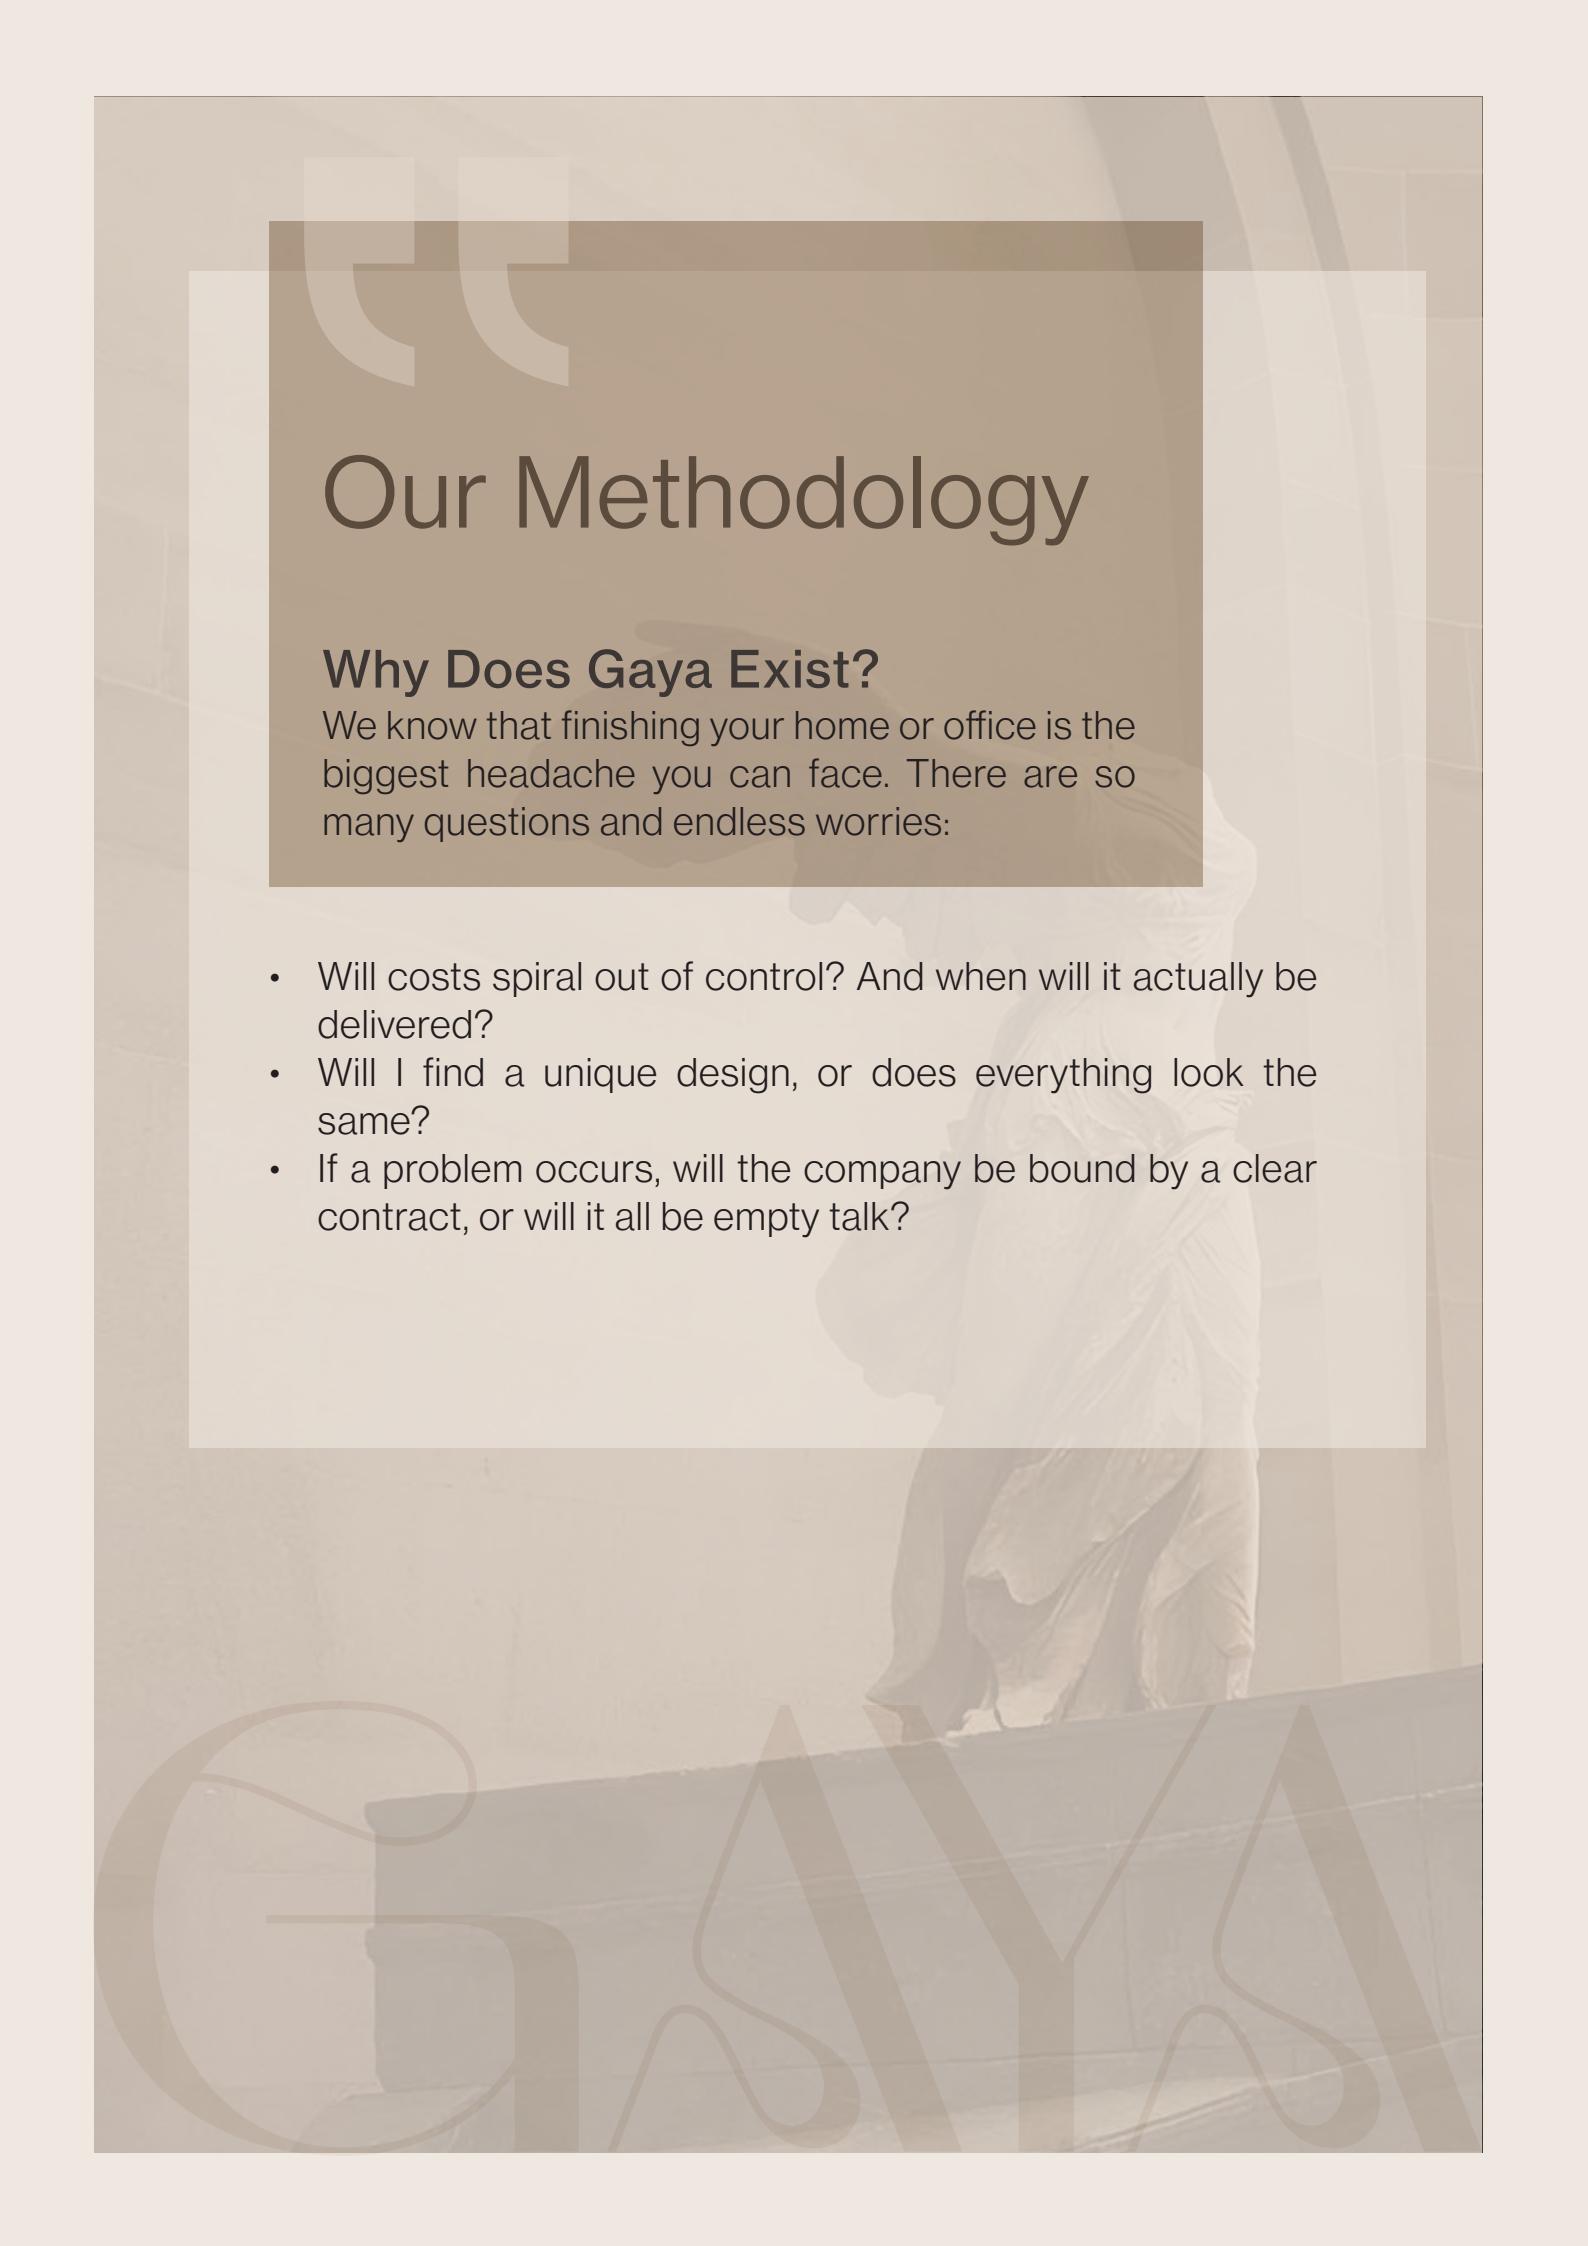

Specialized engineers for designing and executing the custom furniture that completes your home's story.

Gaya Landscape Design

Design and execution of landscapes for villas and commercial projects, with highly specialized swimming pool designs.

Our Methodology

Why Does Gaya Exist?

We know that finishing your home or office is the biggest headache you can face. There are so many questions and endless worries:

- Will costs spiral out of control? And when will it actually be delivered?
- Will I find a unique design, or does everything look the same?
- If a problem occurs, will the company be bound by a clear contract, or will it all be empty talk?

Our System

The Gaya Blueprint™

Clear Steps for Your Peace of Mind

To guarantee a comfortable, surprise-free experience, we developed a clear and proven system:

Step 1: The Meeting & The Concept:

We sit with you and listen to all your ideas and your story. Our design team then translates this conversation into a technical concept and visuals that make you feel the final space.

Step 2: The Plan & The Costs:

We transform the design into a detailed and clear action plan. We define the final budget, the timeline (down to the day), and all technical specifications so everything is crystal clear.

Step 3: Execution & Monitoring:

This is where we take all the headache off your shoulders. A dedicated project manager is responsible for everything, from managing workers and contractors to ordering materials. You can monitor the site yourself, moment by moment, through **live-stream cameras**, in addition to receiving **daily photo and video updates on WhatsApp**.

Step 4: The Handover & The Guarantee:

We hand over your space on the exact agreed-upon date, supervised by our quality assurance engineers, with a **full 3-month guarantee** after delivery to ensure our quality for your peace of mind.

Our Added Value

What Makes Us Different?

Clear Contracts That Protect Your Rights:

No empty talk. Everything is managed through official, binding contracts that guarantee your rights, from the detailed cost estimates to the delivery date and delay penalties.

Complete Peace of Mind:

Simply put, we handle all the headaches. You don't need to worry about any of the details.

Precise & Professional Execution:

Precision is our language. We manage every step professionally to guarantee a result that exceeds your expectations, without any mistakes.

Commitment to Deadlines:

We value your time. We commit to our schedules and timelines because we know how important they are.

You Come First:

We listen more than we talk to ensure that every decision made is one that you will love.

Daily Updates:

We keep you in the loop, step-by-step, so you can be confident and know exactly what's happening on your project.

Post-Handover Service & Guarantee:

Our relationship doesn't end at handover. We stand by you with a real guarantee and quality checks to ensure your continued peace of mind.

Bespoke Furniture:

We design and build unique furniture pieces that complete the story of your space.

Smart Materials Procurement:

We leverage our network to get you the highest quality materials at the best prices, passing any exclusive discounts on to you.

Designs That Stand Out:

We create a space with a unique identity that is all about you, not a copy of something else.

Our Vision & Philosophy

Our Vision

To be the name people trust to build their dream homes, and the first choice for your project with the same level of quality and commitment.

Our Philosophy

At Gaya, the right way to work starts by listening to you carefully. We sit with you to understand your story, what you love, and your memories. Our design begins with you, so that in the end, you feel the space is truly yours—not just another decorated place.
